

# **International Hydroacoustics Workshop 2015**

**Monday 29 June 2015 - Tuesday 30 June 2015**

## **Scientific Programme**

**1 - Civilian applications of IMS data**

**2 - Signal processing techniques for hydroacoustic event detection and evaluation via different types of sensors**

**3 - Reliability of modular components in ocean applications and their maintainability with/without Remotely Operated underwater Vehicles (ROV)**

**4 - Upcoming acoustic/seismic trends in Ocean Observatories**

**5 - Ocean Observatories as "platforms of opportunity" for IMS permanent or temporary replacement hydrophones**
